EC2060
Blanket Warmer

enthermics®

Maintain patient normothemia throughout the entire procedure, reducing surgical site infection risks and aiding in the recovery process. The programmable, quiet and affordable EC2060 blanket warmer with windowed door is built for large capacity patient warming needs. The warming units come with a timer designed for energy efficiency while maintaining necessary temperature levels.

The durable, reliable stainless steel Titan Series blanket warmer quickly and efficiently heats blankets to precise temperatures using the digital controls.

The blanket warmer is warmed using a low-heat-density electrothermal cable array located in the floor and two sides of the blanket warmer and along with a circulating fan evenly heats the interior chamber.

Durable: The affordable, rugged stainless steel cabinets are made to last and work just as hard as you do.

Programmable: Control heat settings to save energy costs.

Service: Our worldwide support team is dedicated to providing quality equipment. We walk with you every step of the way to maximize your return on investment.

Made in the USA with a commitment to quality

Warranty: 5-year parts/1-year labor (US/Canada only)

An ISO 13485:2016 certified company

Standard Features

• Single chamber with two (2) windowed doors

• Stainless steel exterior with four (4) shelves, two (2) are adjustable.
